#### Purpose of Inspection:

This site had not been visited since 1999. I inspected the site while I was in the area to document any changes that may have occurred since that time.

### **Inspection Summary:**

The disturbance at the site remains unchanged but volunteer vegetation has came in nicely on the flat areas.

This site had not been GPS'd, I walked the area to in order to map the total disturbance at the site to document the permit area. The GPS mapping indicates that the total disturbance at the site is 2.8 acres; the map is attached to this report.

I did not have a camera at the time of this visit; therefore; no pictures were taken. I will visit the site in the future to photo-document the area.

#### Conclusions and Recommendations:

The site has remained stable with no environmental concerns noted. I will continue to monitor the site when in the area.
